Pink	HG04973560	\$118.30
Sky Blue	HG04973540	\$118.30

- Consists of: Hand Shower, Quick Connector
- Shower head size: 150 x 63 mm
- Spray modes: Fur Spray, Leg Spray, Paw Spray
- Select button for comfortable alternation of spray modes
- Flow: 1.75 GPM (6.6 L/Min)
- Elongated, brush-like nozzles (1.5 cm) for thorough cleaning with massage effect
- Ergonomic design
- Water Boost: Boost function to increase waterflow when needed
- Suitable for continous flow water heaters
- Connection dimension: DN15
- Rinseable screen seal
- Integrated double backflow prevention

Please Note: This product is available via Special Order only. Allow 2 weeks lead time plus applicable freight.

iBox: Revolutionary Technology

Water-Tight Seals All Around
Rubber seals on the housing and carrier plate create a water-tight installation. Any potential leaks drain into the shower compartment, not into the wall.

Built-In Service Stops
Allows easy servicing of the valve and other components.

Simplified Pipe Flushing
The rough can easily be flushed prior to installing the function block. Hot and cold water remain isolated while passing through the flushing insert.

Trim Includes Function Block
Function block is supplied with trim, not the rough, allowing trim to be ordered later in the process, which may reduce warehousing, theft, and damage due to dirt or frost during the building phase.

Reduced Noise Transfer
The brass function block rests on rubber seals, so pipe vibrations transferred to the wall will be reduced. The trim carrier plate attaches to the housing, not the function block, minimizing noise transfer to the finished wall.

Multiple Mounting Options
Multiple mounting points and depth options allow the rough to be installed with any commonly used mounting system.

180° Rotational Symmetry
Even if the rough is installed upside down, the trim can still be mounted to the rough, avoiding costly repairs.

Extension Set
Even if the rough has been mounted too deeply into the wall, the problem is easily solved with an extension set. The extension set (sold separately) ensures a water-tight seal, keeping the walls free from dampness.

Shallow Extension Set
Limited installation depths are not a problem, thanks to the shallow extension set. Simply installing the set between the tiles and trim allows for installation in walls as shallow as 2 1/4".

iBox: Installation

iBox Universal Plus Package Contents
Rough, installation flange, 1 plug, flushing insert, protective cap, and assembly instructions.

Level Mounting
Mount the rough in exactly the right position using the integrated leveling points.

Shut Off Water
After flushing, shut off water using built-in service stops, operated by an Allen wrench or flathead screwdriver. Replace protective cap.

Create Connection Fittings
When using copper pipes, connection fittings should be created prior to installation.

Connect Water Supply
Solder the water supply pipes and other risers to the previously installed fittings. Note: Please maintain a minimum 4" distance from the housing while soldering.

Cut a Hole in the Wall
Trim a 5" diameter hole in the wall material to accommodate the rough.

Install Connection Fittings
Clamp the rough in a vice using a 3/4" nipple threaded into the top or bottom outlet, then install connection fittings.

Valve Flushing
Simply turn on the water supply to flush the valve. The water passes through the flushing insert, which comes pre-installed.

iBox + ShowerSelect Trims

By integrating the iBox Universal Plus rough with ShowerSelect trims, the hansgrohe brand has done it once again. Creating the perfect shower installation has never been so easy. Geometric design and revolutionary push-button control are

combined into a sleek package. A simple touch of a button is all it takes to switch functions on and off, or to change the spray modes. Everything works purely mechanically, providing long-lasting reliability and satisfaction. Hansgrohe

ShowerSelect Trims are available with square or round escutcheon plates.

Shower Trim Installation

Trim Package Contents
Escutcheon, carrier plate, function block, support housings, mounting screws, handles, handle adaptors, and assembly instructions.

Remove Excess Plaster Shield
Cut the excess plaster shield until it protrudes approximately 1/8" beyond the finished wall.

Seal With Silicone
To prevent moisture from entering the wall, seal the joint between the rough and the finished wall with silicone.

Remove Flushing Insert
Remove protective cap, then remove flushing insert by removing Allen screw. Remember to shut off the water if necessary using the service stops!

Install Function Block
Using the four mounting screws provided, install the function block on the rough. Re-open service stops to turn on water supply.

Install Carrier Plate
Use the included plastic screws to attach the carrier plate to the rough housing, preventing noise transfer and water leaks.

Install the Escutcheon
Simply fit escutcheon over the carrier plate – no screws or bolts needed. Rubber seal and O-rings on cartridges guarantee a firm hold.

Install the Handles
Finally, attach handles with the included set screws.

Completed Shower

Installation Video
For more information, scan for a video on the iBox Universal Plus rough.

Care Instructions

Cleaning the showerhead:

Incorrect cleaning methods and agents may damage to your showerhead. This damage is not covered by warranty.

- Use a soft, clean cloth, but never abrasive items such as sponges or microfiber cloths.
- Do not use steam cleaners, because high temperatures can damage the shower.
- Only use gentle cleaning agents, for example citric acid-based ones. Do not use any cleaning agents containing hydrochloric acid, formic acid, chlorine bleach or acetic acid, as they may cause significant damage. Cleaners containing phosphoric acid can only be used under certain conditions. Never mix cleaning agents!
- Never spray cleansers directly on showers, because spray mist can penetrate into the shower and cause damage. It's best to spray the cleaning agent on a soft cloth and then use it wipe off the surfaces.
- After cleaning, rinse your shower thoroughly with clear water.

Cleaning the faucet:

A faucet is in daily use. While it takes care of cleaning, it itself often becomes a “victim” of dirt and grime. Our hands leave behind greasy residues, along with dirt particles and more. Water also places the material under strain in the form of limescale deposits.

Step 1: The finish on the faucet is best cleaned with a soft cotton cloth (slightly damp only if necessary). By gently wiping, you will already remove most of the dirt without damaging the material. Please do not use sponges, brushes, or microfiber cloths.

Step 2: Limescale residues are typically deposited in corners and at joints. For this, use a mild, citric acid-based cleanser. Please do not spray the concentrate directly onto the faucet but onto a cloth instead.

Step 3: The aerator is easy to remove for cleaning. If you place it in warm water with a little cleaning agent, the deposits will dissolve after about ten minutes of exposure. Lots of hansgrohe products are equipped with QuickClean technology. With this quick anti-limescale function, you can easily rub limescale off of the faucet.

Step 4: Thoroughly rinse the faucet with clear water.

Step 5: Repeat the first step again to remove any cleaning agent residues and give the surface a radiant finish.

Choosing a cleaning agent:

We recommend to use a gentle citric acid-based cleaning agent. Conventional concentrates with lots of cleaning power often irritate hands and eyes; they can trigger allergies and irritate sensitive skin. The faucet reacts similarly. Its material is also attacked if the chemicals are too strong. The damage may go unnoticed at first, but microscopically small scratches or superficial burns are all it takes to cloud the high-gloss finish. In the long term, more dirt and limescale can accumulate in these spots. Gentle cleaning agents are also more environmentally friendly.

If you have hard water in your region, limescale deposits are likely. Keep residues from accumulating by briefly wiping the faucet after each rinsing or washing. This removes tap water before it has a chance to leave deposits behind.

Warranty

This limited warranty extends to the original purchaser only. This warranty is non-transferable. Hansgrohe, Inc. neither assumes nor authorizes any person to create for it any other obligation or liability in connection with this product. If you are a consumer who purchased the product for use primarily for personal, family or household purposes, this limited warranty starts on the date of purchase and extends for as long as you own the product and the home in which the product is originally installed. If you purchased the product for use primarily for any other purpose, including, without limitation, a commercial purpose, this limited warranty starts on the date of purchase and extends (i) for 1 year, with respect to hansgrohe brand products and commercial products, and (ii) for 5 years, with respect to AXOR products. The Rubbed Bronze finish is subject to a 3-year limited warranty starting on the date of purchase.

This limited warranty covers only your manufactured product. Hansgrohe, Inc. warrants this product against defects in material or workmanship as follows: Hansgrohe, Inc. will replace at no charge for parts only or, at its option, replace any product or part of the product that proves defective because of improper workmanship and/ or material, under normal installation, use, service and maintenance. If Hansgrohe, Inc. is unable to provide a replacement and repair is not practical or cannot be made in timely fashion, Hansgrohe, Inc. may elect to refund the purchase price in exchange for the return of the product. Labor is not included in the warranty.

This warranty is limited to products manufactured by Hansgrohe, Inc. that are purchased from a Hansgrohe, Inc. authorized seller by a consumer in the United States or Canada after September 1, 2019, and installed in either the United States or Canada.
